

SENTINEL-AI

The Meme That Watches the Market.

SNTL

Solana

AI Agent

Meme + Utility

01 Overview

SENTINEL-AI (SNTL) is a next-generation meme coin that combines an autonomous AI Agent as a genuine utility. The SNTL Agent operates 24/7 on X (Twitter) and Telegram — monitoring crypto market sentiment, interacting with whales and KOLs, and delivering data-driven insights with the sharp, sarcastic tone of meme culture.

There is no centralized team controlling the Agent. The community of holders decides the Agent's research direction through **Gamified Governance** — an on-chain voting system that gives real power to SNTL holders.

02 Why SNTL Is Different

- **Real AI Agent:** Not just a claim — the Agent actively posts sentiment analysis, monitors whale movements, and responds to market trends in real time.
- **Gamified Governance:** Every 24 hours, the community votes on the Agent's research focus (DePIN, AI coins, RWA, and more). Engaged holders are holders who don't sell.
- **Transparent Buyback:** 2% of every transaction automatically flows into a buyback pool managed by community decisions — recorded on-chain and auditable by anyone.
- **Sentinel Dashboard:** A public website displaying the Agent's live feed, buyback pool balance, and voting results in real time. Transparency is our core product.

03 Gamified Governance

SNTL holders have direct influence over the Agent's operations through a daily voting system:

- Voting via Telegram Bot & Snapshot.org (early phase → fully on-chain in later phase)
- Agent research topics: new DePIN narratives | AI coins | Macro crypto | Custom community requests
- Buyback execution: the community votes on when and how much SNTL is bought back from the market
- Participation threshold: a minimum of 100 valid votes is required to execute a buyback decision

04 Tokenomics

Allocation	%	Notes
Liquidity (DEX)	40%	Locked via Raydium
Community & Airdrop	25%	Voter & early holder rewards
Team & Advisors	15%	12-month vest, 3-month cliff
Development Fund	10%	Server, audit, dev cost
Buyback Pool	10%	From 2% transaction fee

Total Supply **1,000,000,000 SNTL**

Transaction fee: 2% → Buyback Pool | 1% → Dev Fund | 0% holder tax

05 AI Agent Architecture

Component	Technology
Framework	ElizaOS / Node.js
LLM Engine	GPT-4o-mini
Data Source	CoinGecko API + Birdeye
Distribution	X API v2 + Telegram Bot
Hosting	Railway.app (24/7 uptime)
Governance	Snapshot.org (on-chain v2)

The Agent runs on a 15-minute cycle: **Fetch** → **Analyze** → **Generate** → **Post** → **Log**. All output is published transparently on the Sentinel Dashboard.

06 Roadmap

Phase	Target	Status
0 — Genesis	Concept, whitepaper, community building	Done
1 — Deploy	Smart contract + AI Agent live	In Progress
2 — Dashboard	Sentinel Dashboard + governance voting	Q3 2025
3 — Scale	CEX listing, on-chain buyback, 10K holders	Q4 2025

SENTINEL-AI is not a financial advisor. This document is for informational purposes only. Investing in crypto assets carries high risk. Always do your own research (DYOR). The smart contract is audited and verifiable on-chain. The team is committed to transparency and community openness.
